PROFESSIONAL SUMMARY

Recent Electronics and Computer Science Engineering graduate with a strong foundation in full-stack development, CRM operations, and AI workflow automation. Completed coursework and projects in web development, database management, cloud computing, and generative AI. Eager to leverage analytical abilities to build and optimize data-driven solutions, automate workflows, and deliver measurable business impact in a dynamic SaaS environment.

PROFESSIONAL EXPERIENCE

CRM Operations Associate – MyHealthMeter Services

Dec 2025 – Mar 2026 | Mumbai

- Managed end-to-end custom-built CRM powered by SQL, supporting 300+ contracts with customer data maintenance, lead tracking, and database optimization
- Generated analytics reports and monitored KPIs to resolve customer login and appointment issues while managing contract renewals for accounts

Operations Executive – CoWrks India

Jun 2026 – Jul 2026 | Mumbai

- Demonstrated strong leadership skills by directing a team of 4 to drive Converge app adoption across 500+ tenants, consistently meeting daily targets through proactive engagement and strategic onboarding initiatives
- Authorized access cards and managed tenant credentials for 2 enterprise clients, ensuring seamless building access and compliance with security protocols

EDUCATION

Atharva College of Engineering – Mumbai

Jun 2026

Bachelor of Engineering - Electronics & Computer Science

CGPA: 8.6/10

CERTIFICATIONS

AWS Cloud Foundations and Architecting – AWS Academy

Apr 2025 – Aug 2025

Virtual Cybersecurity Internship – AICTE Palo Alto Networks (130 hrs) – AICTE Palo Alto Networks

Jul 2024 – Sep 2024

Data Analysis – Microsoft & LinkedIn (Excel, Power BI, SQL, Pandas, Matplotlib) – Microsoft & LinkedIn

Jun 2025

TECHNICAL SKILLS

JavaScript / TypeScript, React.js / Next.js, Python, SQL / PostgreSQL / MongoDB, REST APIs / API Integration, AWS / Google Cloud, Docker / Git / GitHub, Jira / Agile / Scrum, Power BI / SDLC, Prompt Engineering / AI Agents / AI Workflow Automation (In Progress), LLM / RAG Fundamentals, / Generative AI (In Progress)

CAREER EXPERIENCE

EventPro – Event Management System

Sep 2025 – Jan 2026

- Built scalable full-stack event management system with RBAC and multi-level approval workflows, reducing API latency by 40% through optimized backend queries
- Managed project task tracking, sprint planning, and issue resolution for the development lifecycle within Jira to ensure timely delivery of system features

MindSage – AI Therapist Website

Oct 2024 – Dec 2024

- Developed rule-based AI chatbot using JavaScript and NLP techniques, achieving 95% user satisfaction across 500+ therapy sessions

Clothing Apparel – E-Commerce Platform

May 2026 – Present

- Built full-stack sustainable fashion e-commerce platform using TypeScript and Next.js, featuring product catalogue, cart management, Wishlist, and Razorpay payment integration

- Implemented complex SQL queries to manage inventory tracking and user order history, ensuring high data integrity and efficient retrieval for the e-commerce platform

Gen AI – Business Workflow Automation

- Applied prompt engineering to generate PRDs, investor-focused presentations, and natural language-to-SQL queries across multiple business use cases using ChatGPT
